- Git
- Payload CMS

WORK EXPERIENCE

SOFTWARE ENGINEER (WEB DEVELOPER)

Fantech Labs

September 2023 – Present

At Fantech Labs, I've contributed to various web development projects, focusing on front-end development with Next.js, React, Preact, Astro, and Tailwind CSS. I developed robust applications using TypeScript, JavaScript, Drizzle, and Mongoose. Collaborating with cross-functional teams, I delivered high-quality software and gained experience in backend tasks within the Next.js framework. Additionally, I developed and maintained responsive, user-friendly websites.

FREELANCE WEB DEVELOPER

2023 – Present

Various Clients

As a freelance web developer, I've built and deployed web applications for various clients, providing end-to-end solutions from consultation to maintenance. This experience has enhanced my expertise and kept me current with industry trends and technologies.
